

RUBEN ALEJANDRO CALDERON CORONA

Cloud & AI Engineer · OCI / GCP · MLOps & Observability

+52 777 260 0878 · rubenalejandrocaldersoncorona@gmail.com

PROFESSIONAL PROFILE

Cloud and AI Engineer with 6+ years designing production-grade infrastructure on GCP and OCI. Expert in Python automation, Terraform/Ansible IaC, and Kubernetes orchestration. Deep hands-on experience building AI-powered observability frameworks — integrating ML anomaly detection, ELK stack pipelines, and agentic LLM workflows into enterprise operations. Proven ability to bridge cloud infrastructure engineering with applied AI/ML to automate incident response, reduce manual toil, and improve system reliability.

WORK EXPERIENCE

Senior AI Cloud Engineer

Oracle · Remote | May 2026 – Present

- **AI-Powered Operations:** Designing and deploying AI-driven automation workflows on OCI that leverage anomaly detection models and LLM-based insights to trigger automated remediation, reducing mean time to resolution for enterprise customers.
- **OCI Infrastructure:** Provisioning and managing OCI environments including OKE clusters, API Gateway, OCI Streams, and LBaaS using Terraform and Ansible — ensuring secure, scalable, and high-performance cloud configurations.
- **Python Automation:** Developing Python-based automation scripts to streamline deployment pipelines, operational monitoring, and incident response workflows across multi-tenant OCI environments.
- **Observability Integration:** Implementing observability stacks combining Prometheus, Grafana, and OCI Monitoring with ML analytics pipelines for real-time anomaly detection, predictive alerting, and capacity risk identification.

Software Engineer — Observability & ML Infrastructure

SAP · Monterrey, Mexico | Oct 2024 – May 2026

- **Agentic LLM Workflows:** Architected a production multi-agent RAG pipeline using LangGraph — autonomously analyzing code changes across 5 repositories and updating technical documentation via LLM semantic reasoning and self-reflection loops.
- **ML Anomaly Detection:** Engineered high-throughput Python ETL pipelines ingesting and correlating telemetry signals as the data backbone for the PANDA ML anomaly detection system (Regression & Clustering), achieving sub-second latency at enterprise scale.
- **ELK Observability Stack:** Managed large-scale Elasticsearch/Kibana/Logstash clusters and MemGraph graph databases — optimizing indexing and correlation strategies to power real-time alerting and root cause analysis for distributed systems.
- **CI/CD & Automation:** Automated customer onboarding and configuration workflows via GitHub Actions and OpenTelemetry instrumentation, ensuring 99.9% alerting framework availability.

Cloud Infrastructure Engineer — GCP & Azure

El Puerto de Liverpool · Mexico City | Jan 2022 – Oct 2024

- **Kubernetes & Hybrid Cloud:** Engineered a hybrid environment bridging on-premise VMware with GKE clusters via Anthos; deployed and troubleshooted containerized workloads ensuring high availability for mission-critical applications.
- **Terraform & Ansible IaC:** Spearheaded end-to-end environment provisioning using Terraform and Ansible — automating CI/CD ecosystems with Jenkins and GitHub Actions, cutting deployment lead times by 40%.
- **Data Pipelines & Analytics:** Architected GCP Dataflow + Cloud Composer (Airflow) ETL pipelines feeding BigQuery for real-time analytics and cost optimization via Looker dashboards.

Full Stack Developer / Database Administrator

UYSEEI DYSEE & Jardines Vida · Cuernavaca | 2018 – 2020

- **Backend & APIs:** Built RESTful APIs and microservices in Python (Django/Flask); led PostgreSQL schema design and query optimization for high-throughput reporting subsystems.

CORE SKILLS

- **Cloud:** OCI, GCP (GKE, Dataflow, BigQuery, Vertex AI, Anthos), Azure
- **IaC & Automation:** Terraform, Ansible, Kubernetes (CKA), Docker, GitHub Actions, Jenkins
- **AI/ML & Agents:** Agentic RAG, LangGraph, LLM Integration, MLOps, Vector Search, Anomaly Detection
- **Observability:** Elasticsearch/ELK, Prometheus, Grafana, OpenTelemetry, OCI Monitoring
- **Languages:** Python, Bash, Java, JavaScript, SQL, GraphQL
- **DevOps:** CI/CD Pipelines, Linux Admin, REST APIs, Git

CERTIFICATIONS

- **GCP Prof. ML Engineer** — May 2026
- **GCP Prof. Cloud Architect** — Oct 2023
- **GCP Prof. DevOps Engineer** — Jul 2024
- **Certified Kubernetes Admin** — May 2024
- **Azure Administrator Assoc.** — Jun 2025
- **Azure AI Engineer Assoc.** — Jul 2025
- **GitHub Actions** — Sep 2025

EDUCATION

M.Sc. Artificial Intelligence (In Progress)

University of Texas at Austin — Online

B.Eng. Computer Engineering

UNAM · Graduated with Honors, 2022

LANGUAGES

- **English:** C2 Proficient
- **German:** B2 Upper-Intermediate
- **French:** A2 Elementary
